

Report of the *Stammbuchführerin* on the Testing Year 2020

[the corrected figures of the previous year in brackets]

Verbandsjugendprüfungen (VJP)

In 2020, only 50 [514] **VJP's** were organized including those of the associated clubs abroad. 334 [4705] dogs were registered for the tests. 329 [4430] appeared, of which 327 [4317] were awarded prizes. Thus, of the dogs that appeared, 99.4% [97.4%] successfully passed the VJP.

In 2020 there were no [14] VJPs **with pheasant tracks**, because the pandemic regulations made it difficult or impossible to travel abroad.

In 2020, a special provision made it possible to carry out the **Emergency Solution Tracking Corona 2020**. 486 tests were carried out for this purpose, for which 2262 dogs were entered. Of the 2197 dogs that appeared, 2155 passed the test. That is 98%.

Verbands-Herbstzuchtprüfungen (HZP)

582 [556] **HZP's** were held in the testing year 2020, which includes the results of the clubs abroad. 63 [27] of the HZP's were held **with** the mandatory subject **hare track**. A total of 36 [33] HZP's were held **without** the water test subject "**Search with duck in dense cover**" (§37VZPO) as a result of official restrictions. A large number of the "oIE"-tested dogs were able to demonstrate appropriate performance in the subject "Search with duck in dense cover" at various hunts and other Association tests. The verified results were included in the Ostermann Statistics 2020. A total of 3679 [4016] dogs were entered in **HZP's**, 3432 [3756] dogs appeared, of which 2821 [3063] were awarded prizes. Of the dogs that appeared, 82.2% [81.5%] were successful.

Verbandsgebrauchsprüfungen (VGP)

1650 [1747] dogs were entered in the 327 [322] **VGP's** in 2020. 1565 [1657] appeared, of which 1340 [1424] were awarded prizes. Of the tested dogs 85,6% [85,9%] were successful. 9 [1] of the successfully tested dogs could not show a score in the subject "Search with duck in dense cover" (§72VGPO) due to legal restrictions and could not provide a previously achieved performance certificate and were thus not ranked in the prize categories, did not receive a DGStB number, but were marked "oIE".

Of the 1340 [1424] prized dogs, 1031 dogs = 77% [1088 = 76,4%] ran successfully in VGP's with an overnight track (ÜF) and 309 dogs = 23% [336 = 23,6%] in VGP's with a day track (TF).

Verbandsprüfungen nach dem Schuß (VPS / Association tests after the shot)

In the test year 2020, 85 [79] **VPS** were held. 177 [187] dogs were entered, 172 [175] appeared, 134 [138] dogs were awarded prizes.

Verbandsschweißprüfungen (Association blood tracking tests)

120 [149] **VSwP's** were organized in 2020. Of the 444 [593] dogs entered, 431 [575] appeared, of which 354 [493] were awarded prizes. 82.1% [85.7%] of the participants were thus successful. Of these, 45.8% [43%] received a Prize I, 27.7% [26.8%] a Prize II and 26.6% [30.2%] a Prize III. Of the 354 prize-winning dogs, 50 [65] were successful on the 40h track. 77 [82] handler-dog teams, that is 17.9% [14.2%], did not meet the requirements that a VSwP places on the dog and handler on the day of the test and could not pass the test.

Verbandsfährtenschuhprüfungen (Association blood tracking tests with track shoe)

26 [34] **VFSP's** were organized in 2020. Of the 63 [86] dogs entered, 59 [80] appeared, of which 43 [55] were awarded prizes, including 6 [4] on the 40h track. Thus, 72.9% [68.8%] of the participants were successful. Of these, 48.8% [21.8%] received a Prize I, 27.9% [43.6%] a Prize II and 23.3% [34.5%] a Prize III. 16 [25] handler-dog teams, that is 27.1% [31.2%], did not meet the requirements that a VFSP places on the dog and handler on the day of the test and could not pass the test.

Verbandsstöberprüfungen (Association independent search test)

In the test year 2020/2021 29 [49] **VStP's** were carried out! Of the 118 [212] dogs entered, 111 [208] appeared, of which 90 [170] received prizes, and which will receive the performance mark **St A** [... unleashed from the stand] or **St B** [... accompanied by the handler].

Bringtreueprüfungen (Btr)

893 [1050] dogs were entered for the 185 [211] Btr tests, of which 851 [1024] appeared and 546 [643] passed. 40% [42%] of the unsuccessful dogs were at the fox but did not pick it up.

Comment: Also, information about handler influence yes/no was often missing during the retrieve at the HZP. Many submitted test reports were incomplete, incorrect or outdated. This resulted in a lot of extra work. I would like to take this opportunity to thank all the clubs and Test Directors who promptly made the corrections and returned them as quickly as possible.

Notes: In the case of "**transferred duck scores**", the **certificate confirming performance** in the subject "**Search with duck in dense cover**" must still be documented with date and place and enclosed as a **copy!**

A hearty Weidmannsheil and best thanks to all clubs for the pleasant cooperation.
